YARD *of the* MONTH

February Yard of the Month
Laura and Todd Lamb – 110 Kings Chapel Road

If you have a suggestion for yard of the month please email the board at montclairhoa17@gmail.com

*"We love it here.
This is our neighborhood."*
Fred Savage, The Wonder Years

The Montclarion

Monthly News & Events from your Neighborhood Home Owners Association — February 2022

President's Message

February was a busy Month, Winter Olympics, Super Bowl, and Valentine's Day. We enjoyed visiting several neighbors Super Bowl night. It's great to live in a neighborhood that enjoys getting together!

I want to personally thank our newest board member Wes Hopkins as Treasurer. He truly has a gift, and will be bringing us into this decade's technology with payment options. We missed this year's invoice options, but he's setting us up to have electronic options next year and also for our pool season this year. Wes, thank you again for all your hard work. The board is very thankful to have you on the team!

It was also great to see our neighborhood loving our kids, by opening up the pickleball courts to Heritage Academy's 5th-8th grade pickleball club. During the beginning of their pickleball season they were playing in their cafeteria with the lunch tables turned over as their nets. Anne was asked if the team was able to come over twice a week for their last few weeks of the season and practice here after school. The team really enjoyed playing here and ended up their season with a student/parent tournament Thursday 2/10.

We are thankful for another year living in Montclair.

Greg

Lily
Coffee, tea & bread

Lily's Food Truck will be at the Winding Wood Park on Friday, March 4th.

Stop by anytime between 12:00 & 6:00 pm to try their Vietnamese delights and amazing drinks!

Gardening IN MONTCLAIR

with Suzanne Thomas, Master Gardener

March is the month when spring gardening begins in earnest. Trees are blooming with flowers and new leaves. Fertilize roses and fruit trees with rose and flower food. Winter bulbs including narcissus, tulips, and daffodils are nearly finished blooming. Leave their green stems to create new food and store it in their bulbs for next year's flowers. Fertilize while they are still green with bone meal and a balanced fertilizer (10-10-10). Azaleas are showing their first blooms. Don't be tempted to prune azaleas—not yet! Wait until they finish blooming in May and before they set new blooms in July: ideally that means trim azaleas in June.

Montclair has always been a neighborhood of interest to visitors. This year we have the return of the Masters golf tournament in Augusta with thousands of visitors from around the nation and the world. Let's show off our neighborhood with an especially beautiful appearance. Clean up, fix up, clear up, paint and beautify your property. Take pride in having the prettiest trees, lawns, shrubs, and flowers of any neighborhood in Augusta. It is time to get ready.

March is the time to turn the spring and summer garden. Before you do, have a soil test to determine what if any supplements are needed. In general, most garden areas can benefit from a balanced fertilizer to provide general plant nutrients. What's in a fertilizer? N-P-K means nitrogen (N), phosphorus (P), and potassium (K). What do they do?

Nitrogen is necessary for photosynthesis. Nitrogen supplements are ammonium nitrate, calcium nitrate, and ammonium sulfate. Read the label carefully to determine the amount and type of nitrogen supplement in the fertilizer you buy. Supplementation with fully decomposed vegetative materials such as last fall's leaves helps in two ways. It can supply nitrogen, add bulk to the soil, and yield further micro-nutrient releases. Do not add this week's vegetative matter, though, because that actually removes available nitrogen as the micro-organisms break down the green materials. (Georgia Master Gardener Handbook, 6th edition, UGA, pp. 20-21). Composted cow manure is also a source of nitrogen.

Phosphorous is necessary for plant growth, photosynthesis, respiration, energy storage and transfer, cell division, cell enlargement and other vital processes (p. 21). Phosphorus must be worked into the soil prior to planting to support root development. Look for superphosphate on the label. Potassium is vital to photosynthesis and to development of strong stems, good root systems, and fully developed fruits. Root crops especially need potassium. Look for potassium nitrate or muriate of potash on the label. (p. 22)

Three other nutrients are necessary for plants to thrive: Calcium (Ca), magnesium (Mg), and Sulfur (S). Calcium and magnesium are available in dolomitic limestone that is necessary for tomatoes to prevent blossom end rot. Sulfur is essential in forming plant protein and helps develop enzymes and vitamins. (pp. 22-23) Magnesium sulfate is available as Epsom salts.

Clearly, we must feed our garden before it can feed us. Add the supplements before you turn the soil so that they are completely mixed in below the surface where they can do the most good.

Help us welcome new neighbors!

If you notice a new neighbor, please let us know so we can welcome them to Montclair. This also helps keep our records straight. It is very helpful to let us know if you are selling your house so we can get you the proper documents for disclosure and closing. Email the bookkeeper at montclairbookkeeper@gmail.com or contact one of the board members. We want everyone to feel welcome and informed!
